FEATURES:

☐ Double layered engineered sealing system - nylon no 6 brush system backed with EPDM gasket

☐ Airguard frame manufactured from high strength flame retardant ABS

☐ Requires a 6.0" (152.4 mm) circular cutout in raised floor panel

☐ Overall dimensions 7 1/2"R x 1.81"D (190 mm x 46 mm)

☐ RoHS compliant - meets NECN code for cutouts

☐ Two piece assembly designed to fit around existing cables

DATA CENTER BEST PRACTICES - SEALING AROUND CABLE OPENING:

☐ Reduces bypass airflow and increases under-floor static pressure

☐ Increases cooling efficiencies

☐ ROI (reduces energy costs by lowering CRAC demand)

☐ Hot Aisle / Cold Aisle best practice requires sealed cutouts
